SUMMARY

Full Stack Web Developer with a background in project management and engineering solutions. Effective at using problem-solving skills to find clean maintainable solutions and develop applications with enjoyable user interfaces. Known for ability to balance a variety of projects and challenges and produce a quality product in a timely manner. Excited to get into the industry to learn and grow skillset.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, C, jQuery, Bootstrap, Materialize, Node.js, SQL, Express, Jest, Handlebars.js, MongoDB, ReactJS

Applications: Github, Heroku, Vscode, MySQL WB, Postman, Robo 3T

PROJECTS

Goal Tracker | **Source Code:** <https://bit.ly/3vhSPq0> | **Deployed:** <https://bit.ly/3tOSYAS>

- Application allows user to signup/login where they can Create/Read/Update/Delete goals and milestones within beautiful UI/UX. Information stored in JawsDB database with Express server routing.
- Responsible server side route handling, database interaction, and most front javascript.
- HTML5, CSS3, JavaScript, Materialize, Node.js, NPM, Express, Handlebars.js, MySQL, Sequelize, ApexCharts

quarantinis | **Source Code:** <https://bit.ly/3aCUOxm> | **Deployed:** <https://bit.ly/2QoWYd5>

- Utilizes jQuery ajax calls to cocktailsDB API and dynamically generates cards with cocktail recipes to the webpage for the user to view and interact with. MapQuest API implemented to display breweries based on searched city. Local storage stores saved recipes.
- Lead project architect responsible for all JavaScript work. Guided front end HTML and CSS development.
- HTML5, CSS3, JavaScript, Materialize, jQuery, Ajax

Weather Dashboard | **Source Code:** <https://bit.ly/32SzEgo> | **Deployed:** <https://bit.ly/3gGGMyq>

- A simple one-page dashboard that displays current and 5 day forecast weather for the location user searches (user may use current location). Open Weather Map API is used to ajax call for data based on city name. Last 10 searched cities are stored in list on dashboard for quick search.
- Responsible for full build.
- HTML5, CSS3, JavaScript, Bootstrap, jQuery, Ajax

EXPERIENCE

Project Engineer

2019 – Current

Panhandle Eastern Pipeline Company

Overland Park, KS

Manage and organize 20+ projects at a time for natural gas pipeline maintenance and infrastructure improvement. Design and implement engineered fabrications for field installation. Communicate with contractors to verify work follows contract and ensure company standards are met. Understand project costs per budget and maintain up-to-date forecasts.

Key Accomplishments:

- Successfully organized and completed an entire project to install a new office building at a compressor station. Involved multiple contractors, strict timeline, tight budget, and many challenges to overcome.

EDUCATION

Bootcamp Certificate: Kansas University, Lawrence, KS

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

Bachelor's Degree: Kansas State University, Manhattan, KS

Mechanical Engineering undergrad degree with a variety of elective courses including Aerodynamics, Machine Shop, Management and Finance, and Finite Element Analysis.
